MEMORANDUM FOR: Chief, Information Management Staff, DO

FROM: [REDACTED]

Acting Director of Information Technology

SUBJECT: Key Building Terminal/Line Problems on
23-24 April 1986 [REDACTED]

REFERENCE: DO/IMS-86-189, dtd 28 Apr 86; Same Subject

1. The communications line problems and security implications, which you describe in the reference, accurately reflect the situation with the Key Building access to [REDACTED] and Special Computer Centers on 23 and 24 April 1986. To protect against the recurrence of a similar mistake, we have cautioned the operational and technical personnel and have made a multiplexer hardware change which prevents the switching of those two Key building circuits. With the assistance of OS personnel, we are reviewing the security vulnerability inherent in components of our communications network. [REDACTED]

2. I appreciate the cooperation provided by your staff on the investigation of the incident on 23 and 24 April 1986. [REDACTED]
